

What is claimed is:

[Claim 1] I claim:

1. A “device for automatic delivery of a drinking straw” from the inside of a metal beverage container having an opening mechanism with a bend-down-tongue.

[Claim 2] 2. The device according to claim 1, and the way of holding the straw in the strawholding arm.

[Claim 3] 3. The device according to claim 1, and the mechanism to lock the release-arm against the inner rim of the lid.

[Claim 4] 4. The device according to claim 1, and the spring supplying the power to secure and turn the mechanism named in claim 1.
